- Dog runs
- Exam room instruments
- Food & water bowls
- Grooming & handling equipment
- Harnesses & leashes
- Transportation crates & vehicles

*Concentrate One Step  
Disinfectant Cleaner &  
Deodorizer formulated  
with* **AHP**<sup>®</sup>  
Patented

**Rescue™ Disinfectants** are Deliberately Different™ from other legacy disinfectant products available today. Our unique and innovative Ready to Dispense (RTD<sup>1</sup>) format was designed to make disinfection *easy, reliable, accurate* and *gentle* for people and animals.

**Cleaner** Rescue™ Concentrate has superior cleaning efficacy with no harsh chemicals or offensive odors. Rescue™ Concentrate is an effective cleaner and deodorizer eliminating the smell of feces, pheromones, urine and other soil odors. The smell of clean is no smell.

**Faster** Rescue™ Concentrate provides confidence that disinfection will occur. Rescue™ Concentrate was designed to be effective against a broad spectrum of pathogens including Canine parvovirus in only 5 minutes, improving turnover times and reducing the risk of outbreaks.

**Responsible** Rescue™ Concentrate RTD does not require the use of PPE and is gentle for staff, animals, and the environment. Rescue™ Concentrate was designed without the use of fragrances and does not have strong chemical odors, improving indoor air quality and reducing stress on animals.

**Sustainable** Rescue™ Concentrate provides assurance that the environment will not be negatively impacted. The active ingredient, hydrogen peroxide, breaks down into water and oxygen, leaving no active residues behind and does not require any special disposal methods.

**Compatible** Rescue™ Concentrate is compatible with a wide range of materials. Rescue™ Concentrate will protect your assets by reducing corrosion and wear.

\* See reference sheet for a complete list of pathogenic organisms, additional features, claims, and directions for use.

## Why choose Ready to Dispense (RTD<sup>†</sup>)?

- Ready to Dispense offers a Deliberately Different™ method to simply, accurately, reliably, and safely dispense a concentrate into a bottle or bucket without the need for dilution equipment.
- **Comfort & Confidence:**
  - The ready to dispense technology ensures the right concentration of Rescue™ every time, reducing misuse, spillage or overuse resulting in cost and time savings.
  - The easy to use head was designed for both bottle and bucket fill by connecting the bottle to a water source, ideal for areas with poor or inconsistent water pressure.
  - The built in dilution head eliminates exposure to the concentrate solution, reducing the need for PPE and minimizing the need for staff and volunteer training.

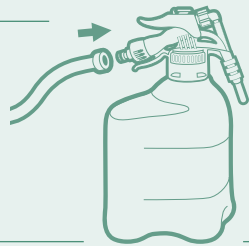

## Four Easy Steps to Disinfection

1  
**Open**

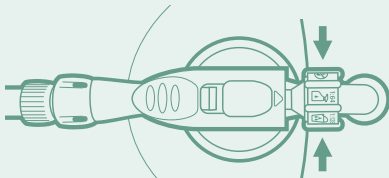

Open the case and read the instructions for use.

2  
**Connect**

Connect Rescue™ RTD to a water supply.

3  
**Select**

Select the desired dilution and fill rate with easy to use icons.

4  
**Fill**

Squeeze handle and fill.  
**You're ready to disinfect!**
